

TEST SET

**WARNING:**

As the Solas require that only from the manufacturer trained people should repair the equipment we do not ! deliver repair materials as scissors, patches, glue etc to unauthorized persons, as in this case the warranty is void and from our experience the damage of the suit is bigger than the existing defect.

Defect and unauthorized repair suits must repaired and check then from an authorized service station.

The testset contains of a very effective closure for the neck of survivalsuits. With this kind of closure the suit can be fast and easy tested without difficult screwing parts together.

The headclosure is supplied with a sensitive pressure gauge showing the required pressure in millibar and kpa with warnings.

The air is supplied with a 2 meter hose which can be connected to every onboard pressure system. To close the air a handvalve is integrated.

Further there is a booklet and a CD in English how to correct make the onboard check of the suits.
